

Safe Streets For All in the Harrisburg Area

In January 2020, the Harrisburg Area Transportation Study (HATS) Coordinating Committee adopted a motion to work toward reducing and ultimately eliminating crashes that result in fatalities and serious injuries in the region.

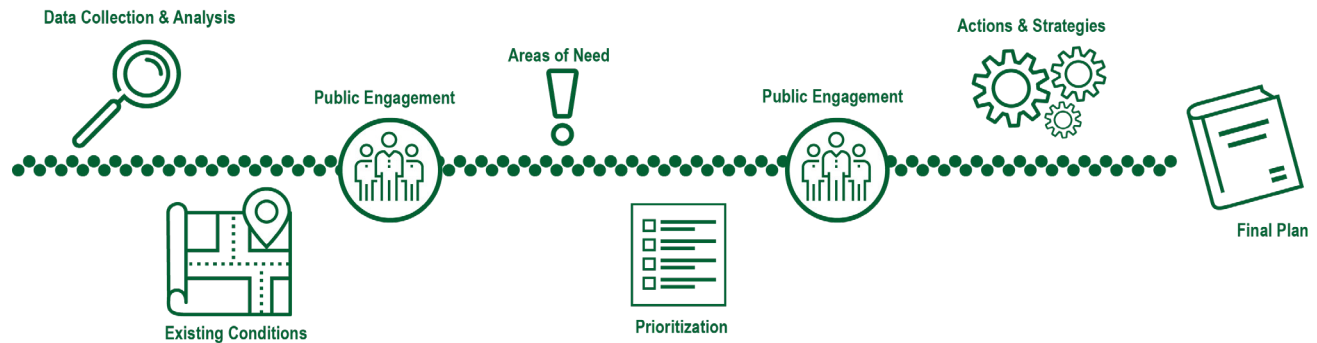

We then secured an FHWA Safe Streets and Roads for All (SS4A) Safety Action Plan grant to enhance and continue our safety and equity efforts.

The resulting Safety Action Plan, with expected completion by summer 2024, will allow HATS to compete for additional federal funds so we can implement a multifaceted approach to making the region's transportation system safer.

As part of our ongoing stakeholder engagement and outreach effort, HATS will continue to work with PennDOT, county emergency management agencies, local municipalities, neighboring agencies, and the public.

The Safety Action Plan and its resulting implementation efforts will be integrated with statewide safety initiatives and other HATS programs.

The project team has conducted an analysis of the Harrisburg region (see graphic) to identify those areas that have experienced the greatest safety concerns over the last five years. This type of analysis helps to identify candidate locations for safety projects or countermeasures.

Safety Action Plan Study Area

Help make our roads safer!

The Harrisburg Area Transportation Study is starting development of a Safety Action Plan that will guide investments in highway safety over the next several years. Your input will help us determine priorities for the plan.

Safety Action Plan Public Meeting

Stuart Community Center
415 Franklin St, Carlisle PA 17013
Wednesday, March 6, 2024
4:00 – 8:00 PM

Participate in our Public Meeting

The project team will host a public meeting in person to go over the results of the existing conditions analysis for the HATS Safety Action Plan. The meeting will consist of a presentation, along with display boards and open discussion.

We hope to see you there!
